

1. Brainstorm project ideas: we finally chose black jack as our final project
  - 2048
  - Black Jack
  - Some kind of forum
2. Develop the main.js file
3. Design the front-end: game.html
4. Improve the UI design: main.css
5. Design the database using SQLite
6. Create the database.js file
7. Design the front-end: changelInfo.html, login.html, pi.html, signup.html, wrongInformation.html
8. Create the server.js file
9. Improve main.js file: Create the Player Robot in the
10. Final testing
11. Develop video instruction and upload
12. Finish our readme and docs
